Celtic Animals Charted Designs (Dover Embroidery, Needlepoint)

Synopsis

Distinguished by its intricate interlacings and elaborate spirals, Celtic art has provided needlecrafters with countless motifs for use in varied projects. This intriguing collection of charted designs by Ina Kliffen incorporates the fascinating shapes of mythical Celtic creatures. Included are forty-three carefully devised color-coded charts depicting a variety of strange and mystifying beasts. Intertwined in the traditional snake-like weaves are eye-catching representations of fabulous fauna that will enhance any needlecrafter's work. Complete instructions and easy-to-follow diagrams enable even beginners to embellish clothing, linens, cushion covers, and other domestic items with a menagerie of eye-catching creations. Ideal for cross-stitch, these unusual designs also work well in needlepoint and other counted-stitch techniques.

Customer Reviews

Just what I had hoped for. Charts are small but easy to enlarge with printers or copiers.

Although the designs appear to be authentic, it would be helpful if there were color illustrations of at

least some of the designs.

Very interesting designs if you like this sort of thing. I am not totally thrilled with some of the charts but this is still a good addition to my library.

I wanted to try some needlework designs in the Celtic tradition and this is a good resource.

not bad

I like the designs, but the total black and white with tiny blocks makes the patterns hard to read. The designs are good, but lacking in color, so if you feel like playing around with them a bit, this is a great book - especially considering the price. Otherwise, I'd probably recommend staying away from it and going with a more expensive, though much more readable and more colorful alternative.

Love it

This book has many different designs available. The designs can be a bit small, and a bit difficult to read. I highly recommend taking these charts and enlarging them before starting work on them. There are a great variety in designs, some will take a while to complete, while others can be completed in much less time.
