Perianesthesia Nursing Care: A Bedside Guide For Safe Recovery

Synopsis

Perianesthesia Nursing Care: A Bedside Guide to Safe Recovery is a key reference for clinicians practicing in preoperative areas, phase I and phase II PACU nursing areas, and nurses working in critical care, OB, and other specialty recovery units. Ideal for perianesthesia nursing orientation and perioperative cross-training programs, this text is beneficial for all those caring for pre- and postanesthesia patients. Additionally, it is a valuable tool for nursing students specializing in critical care and perianesthesia nurses preparing to sit for the Certified Post Anesthesia Nursing (CPAN) and Certified Ambulatory Perianesthesia Nurse (CAPA) certification examinations. Divided into three sections that cover the lifespan, Perianesthesia Nursing Care: A Bedside Guide to Safe Recovery is specifically designed to be functional for the clinician and grounding for the student nurse. The first section focuses on core concepts applicable to all perianesthesia patients and families, while the second is population specific, and the third concentrates on particular surgeries and procedures that follow body systems.

very easy to read for a new PACU nurse like me.

This book has been a big help in revising my Perianesthesia orientation. I like the way it puts a question at the forefront of items & paragraphs, such as "Why do I see....?" This organization promotes critical thinking in a clinical setting versus memorization of facts.

Very helpful for my job as a PACU nurse.

This book has been used to help with the education on newly hired staff, also it was used to study for Specialty Certification. I would highly recommend this book as a staple in your PACU library.

Very informative, and invaluable for this old nurse learning a new specialty!

As for a nurse, this book is a good one. My wife works in the recovery room, she reads this one as a refresher when she needs to.

A great book for nurses who are going to start working in the PACU.

great information for review, teaching and learning new content!
