Sleisenger And Fordtran's Gastrointestinal And Liver Disease Review And Assessment E-Book (Sleisenger And Fordtrans Gastrointestinal And Liver)

Synopsis

For certification and recertification preparation, look no further than the all-new 10th Edition of Sleisenger and Fordtran's Gastrointestinal and Liver Disease Review and Assessment. This all-new test preparation book, by Drs. Emad Qayed, Shanthi Srinivasan, and Nikrad Shahnava, contains 1,200 new single-best-answer multiple-choice questions that test your medical knowledge, clinical reasoning, interpretation, and problem solving skills. Whether used alone or alongside the Sleisenger and Fordtran's Gastrointestinal and Liver Disease text, this review guide will help you fully prepare for your exam. Brand-new editorial and author teams with diverse clinical and academic experience ensure that every question is relevant and reflects current standards of practice. Vignette-style questions prepare you for what you'll see on exams. Content follows the ABIM blueprint for the gastroenterology boards. Detailed answer explanations refer back to the Sleisenger and Fordtran main text for further information, or can be used as a stand-alone review tool.

Customer Reviews

Well done

well done

UPDATED REVIEW : Attentive Editors, Authors, and Publisher! Amazing how within a few weeks Dr. Qayed and Elsevier were willing to listen to my feedback about the unsuitability of the product in its initial form for an electronic review, and made editorial changes on the Inkling platform to allow for interactive assessment as per prior formats. This increases the usability of this resource exponentially and far exceeds the back and forth flipping of the print edition. The interactive edition interacts like a quiz format with the ability for you to check your answer. Well done for your attentive feedback!

ORIGINAL REVIEW : No Interactive Electronic Inkling / Expert Consult Interface, Regressed from 9th Edition Despite Content Update

Was excited for the review and assessment to be updated with the 10th edition, and as a previous user of the 9th edition, was excited to have the Expert Consult / Inkling electronic version with interactive assessments to review these updated questions. Unfortunately, the Inkling version does NOT have any interactive component and while still in the Inkling platform, does NOT track or offer an interactive mode to review the question content. This makes it even more cumbersome and unusable as you have to tab between question and answer sections in order to use. Elsevier has a new online webpage module that offers 3 exams, but I think this is supplemental as this does not seem to be review-able by content section, and does not reflect the questions written for the book. Further this supplement is a web module that requires a browser, internet connection, and is separate from Inkling. This edition misses the Inkling platform advantage completely and is a major editorial oversight since the Inkling platform as demonstrated in the 9th edition is versatile enough to accommodate this. Would highly recommend the Expert Consult team to adapt the 10th edition to reflect the interface of the 9th edition as an interactive electronic interface is a huge draw for this book and it would be a shame to update the content and regress in this manner.

Satisfied!

This review book is easy to read and comprehensive. The high-yield topics in GI and hepatology all seem to be covered. I also liked the clinical cases and the references to the Sleisenger textbook.

This book is exactly what I wanted.
