Synopsis

Remember Shrinky Dinks--those plastic sheets that magically shrink and harden when heated in the oven? Millions of fans do. Now they're back and a hot trend with both mainstream and Etsy crafters. *Shrink! Shrunk! Shrunk!* introduces crafters to this friendly, fast, and fun way to create cool--and surprisingly chic--jewelry. It covers everything from the many new kinds of shrink plastic available (including printable) to the latest techniques. The 35 stylish projects include cute animal-shaped rings, a Mexican oilcloth necklace, origami airplane earrings, and more!

Customer Reviews

"Children of the 1970s and '80s may remember Shrinky Dinks--preprinted pieces of shrink plastic to color and cut out. Modern shrink plastic comes in a variety of finishes, and some plastics can be imprinted with an inkjet printer, but the preparation is the same: color, cut out, and bake until the plastic shrinks. Standout projects include whimsical paper-airplane earrings, a Liberty-esque floral-print earring and necklace set, and several minimalist pendant projects that resemble glass, rather than shrink plastic. VERDICT: Gen X crafters will be intrigued by the retro raw materials, but the projects highlight all of the possibilities of shrink plastic. The pieces are eye-catching and bear little resemblance to the Shrinky Dinks of yore." --Library Journal
"Clearly written, beautifully illustrated, clear, concise and I have to admit that I am planning to give several of the suggested projects a whirl because they are 'that' nice looking. I guess my comment would be 'this

is not your grandmother's--or mother's--shrink plastic art.' The projects that are presented, designed by some really excellent artists, are things that will catch your eye as well as your imagination. You'll find all necessary information about what supplies you will need, none of which are very costly. It's a really fun book, filled with really nice projects that will be sure to please any crafty gal or guy. With adult supervision and assistance, I think that older kids can join in the fun with you, too. --Marie Z. Johansen, Books by the Willow Tree

"I was totally surprised. Happily surprised! This book written by Kathy Sheldon makes me want to go out and buy some shrink plastic. Shrink! Shrunk! Shrunk! is a fabulous book for so many reasons. Kathy has a fun and energetic writing skill. From cover to cover Kathy explains each step and then allows you to add your own touches. If you have ever wanted to use shrink plastic, then this book is for you. Kathy accomplishes what a true craft book writer is supposed to do: inspire her reader. --Nicole Campanella, The Beadwright blog

"Kathy Sheldon will make you want to try shrink plastic again. The book covers all you need to know about shrink plastic and how to work with the medium. If you have been looking for a way to create inexpensive yet still stylish jewelry components that you can also merge into other forms of jewelry making such as wire work and beading, this is an excellent resource to consider. The book has thirty step-by-step jewelry projects, and I honestly did not see one that I did not like. (5-star review) --About.com Jewelry Making

"I see a huge draw for this book for those who work with kids and need creative, fast but really fun stuff to use for craft projects. This is inexpensive, fairly easy and certainly doable in a time crunch. A pretty floral bracelet, with fill-color flower variations, would brighten any mood." --Scorpio Moon Jewelry

Author and editor Kathy Sheldon loves following her hunches to find trends in that sweet spot where the online-crafting world and book-buyers meet. She developed the popular *Fa la la la Felt* and is co-author of the follow-up book, *Heartfelt Holidays*. She lives in Charleston, SC, Asheville, NC, and Windham, ME.

Excellent book, clear instructions and great inspiration and ideas. Actually bought twice-- one for me and later one as a gift.

I got the book and devoured it as I do all the craft/art books I buy. The reason I got this book though is because I wanted to start making my own jewelry from the inkjet shrink plastic. I have been doing this for about 2-3 months now but keep running into a problem that is driving me nuts!! I follow all

the steps for doing the inkjet shrink plastic. But somewhere between baking and sealing I get all this lint on my piece. I've been using a spray acrylic. ANY TIPS WOULD BE HELPFUL, I'VE GOOGLED EVERYTHING I CAN THINK OF AND DON'T KNOW WHERE ELSE TO LOOK FOR AN ANSWER. Thank you for any direction!

My wife really likes this book

I gave this for a birthday gift. I know the 9 year old recipient loved it. I think her 30-something mother loves it more. :) We are planning a grown up, girls night shrinky dink party now. So fun!

Purchased the book while working on ideas for my daughters wedding paper crafts. The book served as a great inspiration but because of the number of items we needed to produce; it was not very practical. Instructions are very clear and easy to follow but I have to admit I used Shrinky Dinks when I was a child. The magic is still there but with a sophisticated twist!

The cover of this book sold me on the content before I even looked inside. Ingenious, quality projects that look like something an adult would make and wear. In most cases, you can't even tell that shrinkable plastic was used to make the items. I love that the introduction of the book talks about other recyclable plastics that can be used for shrinking and also goes over techniques so that you're not basically just going from manufacturer's directions to make the projects. A great collaboration of artists with an eye for mixing fun with quality.

Shrink! Shrunk! Shrunk! covers all the bases when working with shrink plastic. It's great for someone just getting started with the material and offers previous users additional ideas for projects.

Lots of super cute ideas in this book. Unlike so many craft books that you see, these are projects that I might actually use. I am just discovering the uses for shrink plastic and I absolutely adore the ideas in this book.
