Customer Reviews

It is a delight to explore on foot the surprising diversity in nature found in Whatcom County, Washington. Numerous parks and hundreds of miles of trails access storm-sculpted rocky shorelines, rain-shadow beaches, lowland fields and flowers, lakes, streams, verdant forests, waterfalls, breath-taking alpine meadows, glaciers, and towering peaks of the North Cascades, making this one of the most interesting regions in Northwest America to walk. This newly revised and nicely designed guidebook offers a wide selection of trails, from easy walks to more strenuous hikes throughout the county, plus listings of some of the best public parks and viewpoints around.

I live in Whatcom County and this guide to hiking covers all trail heads. I was surprised that it even had some of the private trails, although some are not accessible or have partially disappeared.

Great book for the area.

Great little guide, small enough for a coat pocket. I've day hiked almost all of the trails. Guide is accurate and gives good estimates of when trails are snow free or safe to traverse in snow.

Whatcom county has to be the most diverse geographic counties in the united states, going from

the Salish sea in the west to remote high cascade terrain in the east (with an array of different geographies in between).
