Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Great product, couldn't have navigated the waters without it. Best to keep it in a clear waterproof sleeve tho.

The heavyweight, coated paper makes for a sturdy map that will survive a trip into the BWCAW (besides putting it in a map case). Good for planning routes along with Daniel Pauly's book "Exploring the Boundary Waters".

Just received this map, and am excited to start some basic trip planning. Map I received says Revised 2013.

Great map with good detail

Nat Geo maps are excellent in both their content and construction.

Great navigational map. I have purchased other National Explorer maps and this one was no different. Updated to show current portages and camp sites.

Product is good, esp for overview of potential routes- if you spray it off with clear deck sealer it will shed water better and also float better.

This is great for planning trips and routes. You still gotta get the detailed maps for navigation on your trip, but this is perfect for planning.
