Customer Reviews

Even though it's cheap, this book is still a waste of money. In researching my trip to Borneo, I found more useful and relevant information on WikiTravel for free. I read this Borneo Travel Guide cover to cover in 10 minutes flat - and that feels like how long it took them to research the book. Like a Lonely Planet book, this lists 10 "Must-Dos" but these sound like they were written by someone who has never been to Borneo and just used the internet to source their info. And the writing is abysmal. "Portuguese visited Borneo in 1521, and soon afterward by the Spanish, who started trade affairs with the island." Yikes. As for "food places" that the book specifically mentions in its subtitle - well, all you get is five dishes that they recommend (roti, laksa - one of them is just "Try something Tribal" that uses "simple ingredients that are cooked to perfection", but the only ingredient of these they mention is "cinnamons" [sic]). There are no recommendations of where to get these dishes or places to eat at all for that matter. And besides one paragraph that explains locals in Brunei love shopping at malls (no specifics mentioned), this "Borneo" book never mentions Brunei or Indonesia, only Malaysian Borneo despite the fact that nearly 3/4 of the island is Indonesian.

If you want some changes and see the world in different perspective, then Borneo should be in the top of your list. If you don't know about Borneo, then this book is for you.
