Dutch Ships In Tropical Waters: The Development Of The Dutch East India Company (VOC) Shipping Network In Asia 1595-1660 (Amsterdam Studies In The Dutch Golden Age)

Synopsis

During the closing years of the sixteenth century, the Dutch East India Company fast became a political and economic force in Asia, en route to becoming the leading private company in the world by 1660. This definitive volume explores perhaps the most important tool in the company's trade: its ships. Robert Parthesius here reconstructs the complete shipping activities of the Company through a unique database that charts the movements of even previously ignored smaller vessels. Demonstrating that the wide range of types and sizes of vessels were indeed what gave the Company the ability to sail—and to continue its profitable trade—year after year, *Dutch Ships in Tropical Waters* combines the best of maritime history and archaeological research in order to change our understanding of the logistical dynamics behind one of the most important and successful businesses of this period.

Book Information

Customer Reviews

Robert Parthesius is a maritime historian and archaeologist, as well as director of the Centre for International Heritage Activities in Leiden and a lecturer in historical archaeology at the University of Leiden.

Excellent monography, presenting the case of how VOC - Dutch Companies for East India - developed its shipping network in FarEast, creating many subsidiaries to operate its core business of trade. Very similar to any modern trading company, with the support of military power, whose

technology linked to naval one had become the industrial support to all that trade. The so-mentioned commercial era or commercial capitalism is not only a matter of simple commercial exchanges or barter, but is, overall, a technological advance based on naval power: heavier ships, displacing more tons and military ships, armed with a good crew and powerful guns. I defend this thesis that industrial development of mankind is very close to military developments, since old times.

A thorough study of the VOC, their East Indiamen and the activities of the company in the East. A must for me as a collector of treasure coins and the history they carry.
