Was a great work when it was released. Also important now, nearly 30 years after its initial publication. Some issues, but given its age, a great classic. If you're interested in anthro or Hawaiian history (or even early colonialism), please read!

I had the good fortune to hear Marshall speak, in person, some years ago. Unlike some in the academic world, his talk, on what this book covers, was completely fascinating. I paid close attention to everything he said. His book isn't quite that trance inducing, however what he covers is nonetheless interesting. He presents his material in a way that is easy to follow. The real test of an anthropological text is whether the natives described would accept the observations. I believe native Hawaiians would find this somewhat dry, by their tastes, but nonetheless interesting. The correlation of Lono, and Captain Cook, goes a long way towards explaining what happened, at Kealahou Bay.
