Customer Reviews

Robyn Chapman has studied cartooning at two of the medium's finest institutions, receiving her BFA from the Savannah College of Art and Design and her MFA from The Center for Cartoon Studies. In 2005 she became The Center for Cartoon Studies' first fellow, and spent the next five years as their program coordinator and a faculty member. She has built and managed the curriculum for their successful Create Comics and Cartooning Studio workshops. Her cartooning courses, workshops, and lectures have brought her to classrooms at The New School, Wellesley College, The University of Iowa, and the 92nd Street Y. She lives in New York City. Lab 18: Drawing Without Stopping
Materials- notebook paper- kitchen timer- pencil- ruler- pen- bristol board
1. Pick a time of day when your mind will be fresh, your body rested, and you won't be distracted. For me, this is in the morning, before going to work.
2. Grab your

notebook paper and set your timer for 5 minutes. Write "I'm afraid of..." at the top of your paper. Underneath, make a list of things that scare you. Keep writing for 5 minutes, without stopping. If you can't think of anything, write the word fear until you have something, or doodle little shapes in the margins. The important thing is to keep your pencil moving.

3. Look at your list. Did anything surprise you? Pick a fear that you would feel comfortable exploring in words and pictures.

4. Create a nine-panel grid.

5. In your first panel, draw a moment when you might begin to feel the fear you picked. Start by drawing yourself, then fill in the blanks around you. Draw without stopping. •always keep your pencil moving. Keep your drawings loose and sketchy. Don't erase. If you can't think of anything to draw next, trace some lines you've already made.

6. After that first panel, your story can move in any direction: reality, fantasy, or something in between. Keep drawing without stopping until you've filled your nine panels. Don't plan or think ahead, except for this: as you reach your ninth panel, try to give your page an ending that feels complete.

7. Put your comic away for a week, and don't look at it or read it. After a week, take a look. What do you think of the story you made?

I love the Lab series and this book is one of my favorites. The projects are perfect for beginners or the novice. The layout is inviting.

Great steps, examples and lovely art within. Was a hit with the kids.

Well written and full of great tips and stuff. I found it very energizing to experience this book. For artists from ages 8 to 80. The layout of the book, is also well done. A nice "model" on how a book should be produced. For drawing teachers and home school parents this is a great book to create assignments for your students. As a teacher I am always looking for cool lessons.

Useful

This book is great for people who knows how to draw (how to create proportion, perspective drawing etc). Most of the lab focussed on building characters / stories, but not so much on drawing. The first few labs for example, asking you to draw figures (your characters, draw 10 cats from basic cat drawing, draw 4 people from the park, draw yourself /your avatar in good / bad mood, etc), but the main focus is to find the words or stories that you can fill into your drawing. Although people can

argue that circle and boxes with good storyline could be a nice comic, I'm not so keen about it. I'd better read a book, rather than comic with talking circle, boxes or stick figures.

Wonderful book. I have all of the lab books and they are all great. I am a full-time artist and love the assignments.

I already am a cartoonist. This skims the very basics. Done in a good way. Just nothing new for me to learn here. I have a degree in art so had these skills already. But it is a good book for those just learning.

Not what I expected, thought it would be more drawing comic character how to
