Customer Reviews

I love great smelling fragrances and have spent a lot of money over the years on perfumes and body sprays ... I never entertained the thought of making the product myself, until I read this book. I found Chapter 1, "The Brief History of Perfume", very interesting as well as Chapter 7, "Creating Aromatherapy Perfumes". The author includes easy to follow recipes for many different types of fragrances ... floral scents, fruity scents, and oriental scents. Packed full of great information on the subject of making your own perfumes at home, this book will be a great addition to any "how to" library.

I thoroughly appreciate what the author has done in this book. I enjoy different fragrances and have often wanted to create my own scent. In the past I have looked for books that would help me create my own perfumes but to no avail. Most of the other books either didn't have enough information or were lacking key steps, not with this book. The author walks you through each step as well as stress the importance of having your area set up for creating your perfumes, which is extremely important. I also like the fact the author takes time to talk about the history of perfumes. I always believe if you want to create a product you need to know the history of what you are creating. Trust me when I say, you will not find another book like this one were the author is extremely

knowledgeable on the topic. If are looking for a book to help you create your own unique smells this is definitely the book.

This is a pamphlet, not a book! It's overpriced.

A lot of good info on making custom fragrances for men and women. Also basic information to get started. Reccomend it for anyone interested in creating custom perfume.

I am a newbie in this area, so the book on kindle has been very helpful to mel just .love working with the essential oils!

This is a very comprehensive and detailed list of potential homemade perfumes and, crucially their ingredients as well. Formatting could be improved but takes nothing away from the value of this book.

Always researching & looking for something new.Recommend this product for anyone that is interested in making homemade natural bath & body products.Just livingNatural.....

A very good way to give sufficient description on how to get started on perfume making for people who wants to have an idea on how fragrances are made step by step. I have made a couple of fragrances using this book as a guideline and it came out just the way I wanted. It's a simple book but yet a sophisticated work from the author.
