## **Customer Reviews**

This book is a must read for anyone with an autoimmune illness. The book is very well written and I found it extremely informative. As I read through the book I was surprised at how much I could relate to it. I have Rheumatoid Arthritis and regular treatment with conventional doctors consists of trying to treat symptoms without getting to the root of the problem. Because of this book, I found an organization (Roadback) that is based on the book and they have a website. They can help you find a doctor that uses the protocol.

Changed my daughter's life!!!! She took antibiotics for her JRA starting in 3rd grade and all of her

symptoms went away within a few months. She's in high school now and has no signs of the JRA. The rheumatologist didn't want us to even try it - she would rather keep my daughter on heavy drugs. Very disappointing. Get the book!!!! Easy to read.

This is a must read if you have Rheumatoid Arthritis. After reading the book I emailed the people at <http://www.roadback.org/> to find a list of doctors that prescribe the AP therapy. They answered back in less than 24 hours and we now have a doctor that is treating my wife with AP therapy.

I would rate this book 10 stars if I could. The information in this book encouraged me, a mother of 2 young children, to go to my doctor and begin antibiotic treatment for lupus, after a 2-year struggle (flare) with constant muscular and joint pain. If you suffer from an auto-immune condition, it is worth your time and money to read this book and see if the treatment would work for you.

I find this book to be AMAZING! I have researched ad searched. I have read many books trying to find answers to my 8 year chronic pain disease. This book has so much truthful information that people like me need to hear and act upon. The medical community needs to be rebuked for the abuse of patients. Medical professionals myopic and pharmaceutical conditioning have harmed so many of us. I began the treatment in this book 1 full month ago. It is slow going and has been hard at times, but I am seeing some very hopeful responses in my illness already. THANK YOU for this book.

Amazing! I ordered this book after hearing about Dr. Thomas McPherson Brown & another researcher/doctor who in late 30's-early 40's picked up work done by another doctor years before who suspected that auto-immune diseases were caused by infection. Dr. Brown was eventually able to isolate a tiny microcsm called mycoplasma in fluid from patients & soon proved it to be a fact, as thousands; up to 10,000 afflicted persons, during his lifetime were made better with a simple antibiotic that wrecked havoc on the tiny microcism which burrow deep into tissues, bones, fluid, etc., wrecking havoc on the area of the body in which they reside. He never claimed to cure, or totally eradicate the mycoplasma, but some of the patients refer to themselves as 'cured.' With some of them, it took years, but whether cured or controlled, the patients are grateful to be mostly freed from pain; definitely freed from the killer drugs given then by other docs. After struggling for years to get this system verified via clinicals, it finally happened, but Dr. Brown died before the POSITIVE results were out. Some of his last thoughts were that, after the clinicals proved positive;

as he knew they would, because of his 100% positive results over his 50 yrs., were of how happy he was to know that within a short time, no one would have to suffer the fate that most patients were having to endure at that time. But---didn't happen. Think I recall that it was 2 yrs. before the clinical results were posted in a small inside paragraph of Arthritis journals. See, Pharmas. create & control not only drugs, but what is taught in med. school concerning them. Doctors are hesitant, if at all to prescribe a treatment that isn't 'set up' for a particular ailment. The companies sponsor new drug testing, and they are the judge---on whether THEIR drug should be accepted. (This is an entire other story, but u can research the subject.) Their money comes from the expensive, constant new line of killer drugs to be used in this, (and all other fields.) They, nor the doctors who also profit heavily from them aren't about to have that taken away with the lowly Tetracycline family of inexpensive, safe meds. This is how it stands today. It's very difficult to find a doctor who does or will agree to this protocol, so many patients travel great distances to receive it...In the book, u will be pointed to The Road Back Foundation on internet, only it was in reverse order for me. This site is the greatest thing ever. There are patients there, some of whom were patients of Dr. Brown when he died in late 80's (I think) and newer ones who will contact u, if u make a request on the site. I've spoken with 2 or 3; one of which was Dr. Brown's patient. All have been so helpful and encouraging. They'll send lists of the handful of known doctors who do use this protocol, altho none of the names sent me for supposedly participating ones in my area, were...not sure how their names got turned in as positive....One of the clinicals was held in my city, The University of Ala. Hospital in B'ham, Al. The doc. who headed up the effort did use it, but has now retired. She gave me couple names of docs./interns who participated; 2 of which practice here---but do not use it! Unbelievable!! Can only assume it's the money with them, because eventually it was included in the approved drugs, making it safe for them to use...."as a last resort!" I have to stop; my blood, and probably blood pressure is boiling, just talking about it! I truly believe they should be tried & jailed for malicious treatment which leads to death, when some of them know better, and the others should! (An aunt and friend fall into this category...my aunt's body was destroyed by the chemo & cortisone after a few years, so that she begged the surgeon to operate on her back, even tho he said it was impossible and deadly. He eventually did, when she assured him that if she died, that was O.K.; as she didn't want to live with the never-ending severe pain anyway. (The Rheumatologist told her he'd done all he could do; that the 'meds' he'd given her for 7 or 8 yrs. had outlived their usefulness to her...he sent her home, to the ill-fated surgery, after which she lived few more months. Similar story with a much younger friend, only not surgery. She died in her sleep, her body loaded with several different drugs. If you suffer from ANY of the many auto-immune diseases, I would urge u go go this route, whatever;

wherever it takes.

The science behind this book and AP made perfect sense to me. July 19, 2013 our son began the AP protocol, 100mg minocycline every third day. We kept him on all the rheumy drugs and monitored the results closely. As his pain lessened so did the heavy drugs. He took his last Humira shot on September 5. He stopped taking Celebrex on September 30th. The methotrexate stopped on October 6. Today, 6 months into the AP treatment, our son is in remission. The idea of taking minocycline every 3rd day indefinitely is manageable. We have our son back. Thank you, Dr. Brown and Mr. Scammell.

I read the book then asked my doctors to prescribe the treatment, I was on the antibiotic for approximately 1 year then I went off of the treatment and have not had any problems - I consider myself cured. Working on getting strength and endurance back to the levels that I had before the RA symptoms. Read the book and make your own decisions. Hope it works for you as well.....
