THE AA EFFECT

AND WHY YOU'VE NEVER HEARD OF
THE FDA-APPROVED DRUGS
THAT TREAT ALCOHOLISM

RETHINKING DRINKING VOLUME 1

LINDA BURLISON

Synopsis

Most people (including physicians and alcoholics) are unaware of the FDA-approved medications to fight alcoholism, despite the fact that the US government calls them the "standard of care" for the treatment of alcoholism. So, instead of medical treatment, the vast majority of doctors send treatment-seeking alcoholics to Alcoholics Anonymous-based 12-step programs which result in a dismal failure rate estimated at 90 percent. This book, the first in a 4-book series, delves deeply into what the author calls 'alcoholism culture'. It reveals the truth about the quiet epidemic of deaths from untreated alcoholism, as well as why you may never before have heard of the numerous medications that can help people with alcohol dependence reduce and/or quit drinking. It covers the role of key players in alcoholism culture--from AA to the Obama administration--as well as the journey through where we've been, where we are, and what we need to do next.

Customer Reviews

The information in this book is life changing. It's well researched and written from a genuine

perspective. This author provides you with an in depth exploration of alcoholism and the culture. Linda also describes how beneficial medicinal treatment can be and why medication remains in the shadows of rehab and AA. The facts about alcoholism in this book saddened me, especially because some of my family members suffer from the disease. However, I was given hope after reading this book in its entirety. This book is great for anyone who has exhausted their options on their road to recovery or anyone who knows someone in need of help.
