This book is really a compilation of Harvard Business Review articles on the subject of entrepreneurship. As with all HBR articles, these are quite informative. That being said, different chapters will appeal to different readers, depending if you are a practicing entrepreneur, business school student, or academic observer of entrepreneurship. Since I am primarily a practicing entrepreneur, my favorite chapters are those written by Amir Bhide: The Questions Every Entrepreneur Must Answer, How Entrepreneurs Craft Strategies That Work, and Bootstrap Finance: The Art of Start-Ups. All of these chapters are especially well-written and convey practical information that will enhance the likelihood of success for any start-up entrepreneur. The legendary venture capitalist Arthur Rock also contributes a chapter that contains valuable information. While this book may not be a primary reference or source of inspiration for practicing entrepreneurs, it makes for some excellent complementary reading. Steven K. Gold Author, *Â Entrepreneur's Notebook: Practical Advice for Starting a New Business Venture*

Amazing how some entrepreneurial concepts are just as relevant today despite a whole world of change that has occurred since these men ruled the world.

HBR on Entrepreneurship is a recommended reading for people who would like to be entrepreneurs. It teaches the basics and provides tricks on how to go about being an entrepreneur and establishing a new company. It was very useful for my Entrepreneurship course at Robert Kennedy College.

One of the best books you can get, if you are interested in studying entrepreneurship. real life examples. simply, it is a Harvard Business Review.

This compilation of old articles from HBR is somewhat disjointed and definitely out-of-date. The book is not much more than a blatant attempt to trade on the HBR name at the expense of the consumer.
